

2018 Season

Approval of optional additional tubing to support top rail in driver's compartment.

An optional support bar may be added to the right and left hand side of the driver's compartment with the following specifications:

1. Tubing may only be attached to the rear upright near the hip rail (may not be attached to the hip rail) and the top rail. (See drawing below)
2. Tubing must be 1 3/8" X .083" or greater ASTM4130 normalized steel or equivalent material.
3. The attachment point on the top rail may not be less than 15" from the front upright where it attaches to the top rail. (See drawing below)
4. No additional body work may be attached to the new tubing. The body work on the right side must maintain the current 10" x 21" opening.
