New Size 15.0/95.0-15 Left Rear Dirt Wing Sprint Car Tire

Hoosier Racing Tire is proud to announce a new size left rear dirt wing sprint car tire to accommodate the increasing need for a 95" circumference tire and fill the gap between the current 94" and 96" sizes when needed for rear stagger purposes. The new tire will feature the checkerboard tread pattern and the same spec tire construction as all other left rear sizes currently available in the H12 and H15 compounds.

Tires will be available starting Monday, June 10th.

Item Number	Tire Size	Tread Pattern	Tread Width	Approx. Dia.	Approx. Circ.	Recom. Rim Width	Measured Rim Width	Section Width	Compound
38158	15.0/95.0-15	LCB	15.0"	30.25"	95.0"	14"-15"	15"	18.3"	H12, H15

The chalk mark range will be 98 ½" to 99 ½" with the goal of having batches trend on the larger side at 99" to 99 1/2". Recommended inflating procedure is airing the tire to 25 PSI for 15 minutes and then reduce to your starting pressure. The final rollout should be approximately 4" smaller than the chalk mark.
